

2018

WHITE PAPER

---

# ADD Token

WORLD MOST VALUABLE CRYPTO CURRENCY

**ADD Foundation**  
Decentralized Management

## INTRODUCTION

"ADD WILL" is one of the pioneer technology that was founded in 2016 which are based on Financial Technology (FINTECH) and Block Chain (BLOCK CHAIN). The team is committed in creating a combination of block chain + smart contracts + financial services in a mission of creating the world's first "encrypted digital will" in order to innovate people's understanding of asset digitization. Node with the encrypted block chain assets, decentralizing management and intelligent smart contract, both party will easily reaches a transaction agreement with characteristics of the enhance future digital tokens towards an unlimited value of usability.

"Encrypted Digital Wills" will be the latest service platform for the development and integration of large data technology, which will be used to solve the unfair agreement rooting to challenges of family disputes, capital monopoly and relationship rupture. It is also to set back the traditional contract transactions and to grasp the assets and services system.

Block Chain Application Management Collectively integrates excellent intelligence for our technical team in order to actively expand the importance of our infrastructure and service systems. This ensure the collaboration of handling and solving the future complex issues.

### **"ADD WILL"-----**

*The will is that everyone knows it's important!*

*But how many people will really plan beforehand!*

*To ensure that property, assets can be renewed to the next generation?*

*For decades, traditional text documents submitted to the law firm, who will be complicated procedures to digitize it? The rapid development of the national economy, the old property left over from the ancestors and lots of nobody claimed to hinder economic development, the government every 20 years to rectify the need to clean up the remnants of relics and trillions of dollars. Prior planning to give yourself a person in charge of life, will be a practical stability, security, considerate account to the family and loved ones!*

*ADD WILL "Encrypted Digital Candidate" is a new generation of technology that provides digital will services through intelligent contract distributed block chains to solve most of the intricate families, friends, colleagues, shareholders, partners and ignorant relationships Problem!*

*ADD WILL login achievements of a gentle and harmonious family, the stability of the future development of enterprises.*

## 1.5 WHO ARE WE?

ADD TOKEN is an offered crypto currency that was produce by ADD Foundation. The foundation was founded in 2016 by a group of successful CEOs, financialist and software programmers.

Original idea started by the ADD Founder who foreseen his family and friends major dispute over asset's inheritance issues. This has trigger his eagerness to resolve this worldwide complex issues by gathering a group of elite to figure out a new solutions which might change the history forever.

Therefore, ADD Foundation was officially founded.

## 1.6 CORE TEAM MEMBERS

### THE EXECUTION TEAM LEADER:

#### ADD FOUNDER / CEO

##### Mr. Terry K.W. Low

Started his career in Online Financial Fund, Commodities Trades, and Foreign Currency Exchange.

Later involve in crypto currency Technology Research and Development.

Highly experienced with great expertise in Managing Public Listed Company and is still currently an advisor in a Public Listed Group of Companies.

#### Chief Technology Officer / CTO

##### Mr. Steffen Haase

2003 - Microsoft Cert. System Admin

2004 - Software Development RND

2008 - Honor Cert.LPIC-1 LINUX

2015 - Block Chain RND

#### IT & Software Development Director

##### Mr. Anderson K. Jong

Bachelor's Degree in Computer Science

University Of North Carolina (UNC) USA

2004 - Google SEO Dept. RND Team

2008 - STB Sarawak Tourism Board Chief of IT Dept.

2010 - Founder of Future Platform Inc. Software Development Company

2015 – Currently still IT Development Advisor for Public Listed Company

#### Chief of Art & Creative Design / CAC

##### Ms. Adeline Vernet

2015 - PCA Paris College of Art France

2015 – Still Currently CAC of Public Listed Company

## 1.7 TEAM BACKGROUND

THERE ARE MANY MORE WHO HAS JOIN OUR TEAM, SOME DUE TO CONFIDENTIALITY, WE ARE UNABLE TO DISCLOSE CURRENTLY. These experts of their own field bring has nourish their contribution to our project, this will definitely change the financial world.

In our entourage, there are:

- Managers of the finance field;
- Successful company founders;
- Specialists in private fund management;
- Lawyers, notaries, accountants and renowned tax experts;
- Business development manager;
- Risk management specialist;
- Regulation manager;
- Marketing managers with complete team;
- Complete team of programmers-analysts;
- Back-end, front-end with network architects team;
- Strong renowned network security specialist;
- Customer service team;

ADD Foundation gathers all types of specialists for the accomplishment of its mission. The team is growing rapidly. If you think you have some similar expertise in what we are doing, we invite you with wide arms open, so please do not hesitate to contact us through email: [hr@addtoken.io](mailto:hr@addtoken.io)

## **1.8 TEAM STRATEGY**

### **1.8.1 Creative Ability**

- Innovative
- Beyond Limit
- Pursuit Excellence

### **1.8.2 Execution Ability**

- Customer-centric, Business-oriented,
- Fairness,
- Social development

### **1.8.3 Leadership Ability**

- To promote integrity and honesty
- Innovation
- Responsible professionalism

### **1.8.4 Operative Strategy**

- The implementation of business ideas, to achieve business objectives of the basic approach and guidance, for the cash-free era of enterprises facing important issues and the guiding principles taken. The planning of the business principles and policies.

## **1.9 MESSAGE FROM THE CEO**

In the current glory era of Financial Technology (FINTECH), it is a necessity to understand and analyse the future improvising of Block Chain Technology. Which are the conservative methods that will and should be replaced in order to gain better results. The important segments that are worth looking into are not only how the decentralized Block Chain are able to change the financial market, but it is also an essence to develop it towards a new threshold of any other new market.

Block Chain's core major key role is the peer to peer nodes of safe and secure encrypted decentralized data collection. With this, it shall also be able to realistic all aspects of daily life necessity which range from personal assets management, food and beverages industry, entertainment industry, energy industry and many more. With the current realization of Smart Contract in Block Chain Technology, we have managed to reach a whole new threshold in solving complex and disputed commercial issues. This will definitely minimize the losses that once what we couldn't avoid and secure personal financial and assets with ease.

For this, I bring you "ADD WILL"

Let us "Glorify FINTECH By Realising The Future of Block Chain"

Truly,

**FOUNDER & CEO  
TERRY LOW  
ADD FOUNDATION**

## 2.0 COMMUNITY PROJECT INTRODUCTION

### 2.1 PROSPECT SECTION

“Creating the financial glory of the Internet, Realization of the better future block chain”

Team is a community of employees and management that rationally utilizes the knowledge and skills of each member to work together to solve problems and achieve common goals.

Enterprises, the leaders of the various departments with qualified management quality, strategic vision, strong sense of responsibility and management efficiency.

### 2.2 ADD WILL TRUSTEESHIP

- **Smart Contract**
  - Implementation smart contract operation to avoid fraud and unfair transaction risk.
- **Decentralized Block Chain Data**
  - Easy to secure online transactions, distributed electronic sub-account, to prevent collusion and change records.
- **Secure Encrypted Node**
  - Peer To Peer P2P
- **Prevention To Reduce Risk**
  - Proof of Authorization PoA

### **3.0 THE ADD TOKEN PROJECT**

#### **HOW ARE WE DIFFERENT?**

For those who are familiar with various ICOs and to funding new company, normally they will quickly notice that ADD TOKEN is totally different.

We do not rely on some other ICOs as well as their processes. Nevertheless, we do check out others available offers and be aware of the new technologies, but that doesn't mean that we copy them.

We understand that some ICOs have identical websites or even very close similar ideas. We even noticed that some images of some team members presented were the same across few different companies which is something that we can rest assure that we doesn't have this issue at all.

We also ensure that all ADD TOKEN photographs are totally not forged, nor misleading any persons. By giving accurate information in order to secure our members, we set the record straight and remain transparent on what we deem important to reveal.

Due to our nature of technologies, we target not only to the crypto currency experts, but also to general public. Our full team is dedicated to answering your questions, therefore we installed an online chat service on our website and we answer your emails within 24 hours. You may also contact us at our official email at [info@addtoken.io](mailto:info@addtoken.io)

#### **OUR GOAL**

The ADD Foundation are always focus on providing its members the total control over their finances and offering them the essential tools to achieve this goal in a completely safe and decentralized way.

A total peace of mind based on the confidential management of your finances is within your reach. The promise is to ensure you an entirely independent way of managing your finances based on the proper functioning of a bank in a timely manner.

### 3.1 ADD TOKEN

#### ADD TOKEN BY ADD FOUNDATION

For those who have yet any basic knowledge for Crypto Currency, let us brief you of this.

A cryptocurrency (or crypto currency) is a digital asset designed to work as a medium of exchange using cryptography to secure the transactions and to control the creation of additional units of the currency. Cryptocurrencies are classified as a subset of digital currencies and are also classified as a subset of alternative currencies and virtual currencies.

The **ADD Token (Currency Symbol: ADD)** is a whole new cryptocurrency that were created with the latest Block Chain Technology based on Ethereum Smart Contract.

#### The ADD Token Functions:

##### Buy ADD Token

- Directly from the ADD Wallet;
- Exchange Platform (Poloniex, Bittrex, Bitfinex etc.);
- From your contacts

##### Sell ADD Token

- Directly on the ADD Wallet;
- By withdrawing money from ADD Express Card at any affiliated MasterCard/VISA ATM;
- Exchange Platforms (Poloniex, Bittrex, Bitfinex etc.);
- To your contacts.

- Make daily purchases
- Make online purchases
- Make payments to your contacts
- Use it wherever you are in the world
- Set up automatic periodic transfers
- Pay your rent
- Make payment in our affiliated merchant

And much more!

ADD Token will be a common currency that might be used anywhere in the world, without amount limitations, without fees and without delays. You will be the only one to manage your financial.

Therefore, you will be the only one to decide what to do with it. Cryptocurrency will eventually outpace traditional money.

The number of users and the number of transactions will and has never stop increasing.

### **3.2 ADD WALLET**

ADD Wallet will be available on PC, on MAC at first, and as a mobile application that you may download from the App store or from Google Apps as soon as the launching of ICO (The End of Pre-Sale). ADD Wallet will give you the freedom to manage your financial, to transfer funds, to buy or sell ADD Token, to give assets to your contacts or to pay your bills.

You will also have access to useful options such as a budget tab and a market evaluation tab. You will even have the possibility to configure automatic ADD Token buying and selling options.

Every transaction made from the ADD Wallet will come at no fee! They will be totally safe and immune to prying eyes. It will be possible to use ADD Wallet from anywhere in the world. For example, a member may transfer US\$ 100,000.00 from Dubai to Paris in a few seconds, without the funds to be frozen and without facing banking beaurocracy issues.

ADD Wallet will be an essential tool for your financial operations and will include all of our products.

### 3.3 ADD EXPRESS CARD

Revolutionary and unprecedented, ADD EXPRESS Card will be accepted everywhere in the world, regardless of your country's currency. Your card will adapt to the geographical area in which you are located. ADD EXPRESS Card will be linked to your ADD Wallet and LATER ON to your ADD TOKEN. When you make a purchase with the card, our system will target the best available exchange rate and will debit your account of the exact ADD TOKEN amount corresponding to your purchase in order to confirm the transaction.

No more credit limit, no more questions on your transactions. You will be the only one to control your finances. We unceasingly repeat that no person or company will be able to consult your transactions. Therefore, we cannot directly deal with MASTERCARD. We thus deal with a sister company that issues MASTERCARD and that meets our expectations.

There already exist similar cards on the market that displays the MASTERCARD logo, that are accepted by MASTERCARD terminals, but that are not issued by MASTERCARD. Our difference? We will offer options that do **not exist yet** and provide **enhanced security**. We will also offer ADD TOKEN rewards bonus program on all purchases.

Therefore, we do **not** have a direct agreement with MASTERCARD, but we provide credit cards that will be accepted everywhere and that will be directly connected to your ADD WALLET. At the time of writing these lines, we are assessing our cards, and the result is definitely up to our expectations.

### **3.4 ADD FOUNDATION BANKING TRUST FUND**

Acquisition of investment bank in International Business District (International Business Financial Center) Malaysia, in the addition to the new special "digital asset custody" improving the service of electronic wallet, trade and exchange services with close monitoring.

- Special Digital Asset Management Counter
- Digital Commodity Trading Service
- Dollar Exchange Service's Counter
- Administer Service

### **3.5 PROSPECTED TRADING PLATFORM**

- **POLONIEX**
- **BITTREX**
- **BITFINEX**

TARGETED IN TIME MANNER OF 3 MONTHS AFTER ICO (3 MONTHS AFTER PRE-SALES END)

## 4.0 BLOCK CHAIN TECHNOLOGY & OPERATION

A blockchain – originally block chain – is a continuously growing list of records, called blocks, which are linked and secured using cryptography. Each block typically contains a hash pointer as a link to a previous block, a timestamp and transaction data.

By design, blockchains are inherently resistant to modification of the data. A blockchain can serve as "an open, distributed ledger that can record transactions between two parties efficiently and in a verifiable and permanent way." For use as a distributed ledger, a blockchain is typically managed by a peer-to-peer network collectively adhering to a protocol for validating new blocks.

Once recorded, the data in any given block cannot be altered retroactively without the alteration of all subsequent blocks, which needs a collusion of the network majority.

Blockchains are secure by design and are an example of a distributed computing system with high Byzantine fault tolerance. Decentralized consensus has therefore been achieved with a blockchain. This makes blockchains potentially suitable for the recording of events, medical records and other records management activities, such as identity management, transaction processing, documenting provenance, or food traceability.

The first distributed blockchain was conceptualised by an anonymous programmer or group of programmers, known as Satoshi Nakamoto, in 2008 and implemented the following year as a core component of his digital currency – bitcoin – where it serves as the public ledger for all transactions.

The invention of the blockchain for bitcoin made it the first digital currency to solve the double spending problem without the use of a trusted authority or central server. The bitcoin design has been the inspiration for other applications.

A global network of computers uses blockchain technology to jointly manage the database that records Bitcoin transactions. That is, Bitcoin is managed by its network, and not any one central authority. Decentralization means the network operates on a user-to-user (or peer-to-peer) basis.

## 4.1 BLOCK CHAIN SUMMARY OF USABILITY

### Hierarchy DAO Governance

To the Center for Self-Governance (DAO) is the ideal product of cryptography. The origins of DAO can be traced back to the work of the organization described by Ori Brafman in the "Starfish and Spider" (2007), and the "reciprocal production" described by Yochai Benkler in "Network Wealth" (2006) peer production. But these two concepts are linked to techniques related to cryptographic currencies, and Dan Larimer presents the concept of DAC, which he sees as a DAC.

In order to have a clear definition of the DAC, we summarize the seven necessary features of the DAC:

- Openness, the design of the DAC system is transparent, open and transparent is the basis of the entire DAC system, a black-box operation of the organization cannot be used as a DAC, the current software open source has become a typical example of openness:
- To be decentralized, without the presence of individuals and organizations to control the entire DAC, this feature determines the self-similarity, to the center of the characteristics of the DAC system to ensure the vitality;
- The autonomy of the DAC system can be involved, the participants are subprojects or sub-units of the DAC system and contribute to the development of the DAC from their own; The self-sufficiency of the participant guarantees the operation of the DAC;
- Value, the DAC system must be an international bidding network, anonymous transaction, tax avoidance, value storage, non-freezeable, non-enforceable, such as a special currency system, which has a value of use, which determines the value Coin DAC system profitability;
- Profitability, DAC participants will be rewarded for the development of the DAC system, and the profitability is determined by the value of the DAC;
- Self-similarity, even in the case of only part of the DAC node, the DAC system can still function and develop, the destruction of part of the unit node will not affect the development of DAC, by the decentralization of the guarantee;
- Democracy, changes in the DAC system's core protocol require the overwhelming majority of the unit's voting to be completed, and the centralization and autonomy dictates that the DAC must be a system that can be voted on.

## 4.2 THE ETHEREUM TECHNOLOGY (WHAT WE BASED ON?)

### **Build An Unstoppable Applications**

Ethereum is a decentralized platform that runs smart contracts: applications that run exactly as programmed without any possibility of downtime, censorship, fraud or third-party interference.

These apps run on a custom built blockchain, a very powerful shared global infrastructure that can move value around and represent the ownership of property.

This enables developers to create markets, store registries of debts or promises, move funds in accordance with instructions given long in the past (like a will or a futures contract) and many other things that have not been invented yet, all without a middle man or counterparty risk.

On traditional server architectures, every application has to set up its own servers that run their own code in isolated silos, making data sharing hard. If a single app is compromised or goes offline, many users and other apps are affected.

On a blockchain, anyone can set up a node that replicates the necessary data for all nodes to reach an agreement and be compensated by users and app developers.

This allows for the user's data to remain private and apps to be decentralized like the Internet was supposed to in the first place.

### **Smart money, smart wallet**

The Ethereum Wallet is a gateway to decentralized applications on the Ethereum blockchain. It allows you to hold and secure Ethereum and other crypto-assets built on Ethereum, as well as write, deploy and use smart contracts.

### 4.3 WHAT TECHNOLOGY DID WE DEPLOY?

Ethereum is a decentralized exchange protocol allowing for the creation by the users of smart contracts thanks to a Turing complete language. These smart contracts rely on a computing protocol that recognizes the verification or the application of a mutual contract. They are deployed and available for public consultation on the blockchain.

Ethereum uses a denominated count unit called Ether as the payment method for these contracts. The corresponding acronym used on exchange platforms is ETH. Ethereum is the second decentralized cryptocurrency in importance, with a capitalisation of more than 15 billion euros.

An **ERC20** token is no different from any other token, it just happens to comply with Ethereum's token standard. Why would Ethereum need a token standard? Interoperability. If all tokens created on the Ethereum network use the same standard, those tokens will be easily exchangeable and be able to immediately work with Dapps, that uses the **ERC20 standard**.

A token is "standardized" when it uses a certain set of functions. If developers are aware of how a token operates, they can easily integrate it into their projects with a reduced fear of bugs or errors. If multiple tokens behave similarly, operating the same functions in the same way, a Dapp can then easily interface with different sub-currencies.

The ERC20 token standard describes the functions and events that an Ethereum token contract has to implement.

How does a token contract work? Hereunder is a fragment of a token contract to demonstrate how it maintains the token balance of Ethereum accounts:

```
pragma solidity ^0.4.16;
```

```
interface token {  
    function transfer(address receiver, uint amount);  
}
```

```
contract Crowdsale {  
    address public beneficiary;  
    uint public fundingGoal;  
    uint public amountRaised;  
    uint public deadline;  
    uint public price;  
    token public tokenReward;  
    mapping(address => uint256) public balanceOf;  
    bool fundingGoalReached = false;  
    bool crowdsaleClosed = false;
```

```

event GoalReached(address beneficiary, uint amountRaised);
event FundTransfer(address backer, uint amount, bool isContribution);

/**
 * Constrctor function
 *
 * Setup the owner
 */
function Crowdsale(
    address ifSuccessfulSendTo,
    uint fundingGoalInEthers,
    uint durationInMinutes,
    uint etherCostOfEachToken,
    address addressOfTokenUsedAsReward
) {
    beneficiary = ifSuccessfulSendTo;
    fundingGoal = fundingGoalInEthers * 1 ether;
    deadline = now + durationInMinutes * 1 minutes;
    price = etherCostOfEachToken * 1 ether;
    tokenReward = token(addressOfTokenUsedAsReward);
}

/**
 * Fallback function
 *
 * The function without name is the default function that is called whenever
 anyone sends funds to a contract
 */
function () payable {
    require(!crowdsaleClosed);
    uint amount = msg.value;
    balanceOf[msg.sender] += amount;
    amountRaised += amount;
    tokenReward.transfer(msg.sender, amount / price);
    FundTransfer(msg.sender, amount, true);
}

modifier afterDeadline() { if (now >= deadline) _; }

/**
 * Check if goal was reached
 *
 * Checks if the goal or time limit has been reached and ends the campaign
 */
function checkGoalReached() afterDeadline {
    if (amountRaised >= fundingGoal){
        fundingGoalReached = true;
    }
}

```

```

        GoalReached(beneficiary, amountRaised);
    }
    crowdsaleClosed = true;
}

/**
 * Withdraw the funds
 *
 * Checks to see if goal or time limit has been reached, and if so, and the
funding goal was reached,
 * sends the entire amount to the beneficiary. If goal was not reached, each
contributor can withdraw
 * the amount they contributed.
 */
function safeWithdrawal() afterDeadline {
    if (!fundingGoalReached) {
        uint amount = balanceOf[msg.sender];
        balanceOf[msg.sender] = 0;
        if (amount > 0) {
            if (msg.sender.send(amount)) {
                FundTransfer(msg.sender, amount, false);
            } else {
                balanceOf[msg.sender] = amount;
            }
        }
    }
}

if (fundingGoalReached && beneficiary == msg.sender) {
    if (beneficiary.send(amountRaised)) {
        FundTransfer(beneficiary, amountRaised, false);
    } else {
        //If we fail to send the funds to beneficiary, unlock funders balance
        fundingGoalReached = false;
    }
}
}
}
}

```

Note: Due to confidentiality of our complex Smart Contract Technology code writing, above is only a sample of some of the code that we will be using.

## 5. SMART SERVICES & SOLVENT

The most accurate statement of the block chain is the encryption of the ledger transaction and the database technology, which is distributed with the entire network, maintained by the branch computer on the network, and continuously updated from the network to the current time from the date of innovation.

The network is a completely decentralized system. System maintenance is also carried out on a voluntary basis. Network blocks are also called a new way of computing because they can overcome the many drawbacks of many centrally managed systems in database management.

On the other hand, a smart contract is a set of pre-determined code systems that can run a complete Turing process in which all encodings can run all of their pre-determined rules and persistence, once the system is prepared Ready, it will not be made by either party to make a change or a unilateral amendment.

The digital tokens are a series of calculations based on the Ethereum coding of the smart contract and are also derived from the power of the relevant intellectual property application to support or consider it to be a flow through the entity, and the digital tokens have such characteristics Can play a corresponding role as a tool in the above unreliable trading system.

## 5.1 THE MAJOR FIVE ELEMENTS CONSENSUS

- **PoW - Proof of Work**

A **proof-of-work (POW)** system (or protocol, or function) is an economic measure to deter denial of service attacks and other service abuses such as spam on a network by requiring some **work** from the service requester, usually meaning processing time by a computer.

- **PoS - Proof of Stack**

Hybrid "**Proof of burn**" and **proof of stake**. **Proof of burn** blocks act as checkpoints, have higher rewards, contain no transactions, are more secure, and anchor both to each other and to the **PoS** chain, but are more expensive.

- **Pol - Proof of Information**

Providing and safe keeping of information at a more secure peer to peer chain. It's a brand new technology that we are proud to of.

- **PoA - Proof of Assets**

Proof of Assets provides digital documentation for homes and businesses. We will photography the exterior, interior, and all contents.

- **PoA - Proof of Authorization / Power of Attorney**

Turbo Ethereum supports Proof-of-Authority (PoA) private chains through the Fluidity core ethereum client flu. Proof-of-authority chains utilise a number of secret keys (authorities) to collaborate and create the longest chain instead of the public Ethereum network's proof-of-work scheme (Ethash).

## 6.0 INITIAL COIN OFFERING

### 6.1 Pre-sale (ICO)

This section will inform you of important aspects of the ADD TOKEN pre-sale, which will be launched for the registered members on Nov 12, 2017, at 2:00 p.m. GMT+1. For the people who did not register, the official sale will begin on Nov 19, 2017, at 3:00 p.m. GMT+1.

### 6.2 Why a pre-sale?

An ICO (Initial Coin Offering) pre-sale is an unregulated means of crowdfunding. Early ICO's were for funding development of new cryptocurrency instruments, but modern ICOs serve any purpose.

Generally, tokens are sold to raise money, with token existence and behaviour defined by mathematical contract algorithms. Unlike an initial public offering (IPO), the token acquisition is not regulated by the government, and may or may not grant ownership or other rights in the venture.

In order for ADD TOKEN to become an international phenomenon and for everyone to talk about it, we had to create a buzz around this pre-sale. The means used to achieve this goal was the percentage of profit attributed (projection) according to the sale level (ROI), an unusual method in the ICO market.

The ADD TOKEN pre-sale will allow collecting estimation of **USD\$ 33, 750 000.00** (If Upon Full Completion Sale)

These funds will be used to develop, design and to market the ADD FOUNDATION products. They will also be used to maintain the market. You will find more details on ADD FOUNDATION budget of this white paper.

Therefore, we hope to sell all the available ADD TOKEN (75, 000 000.00 ADD) on the pre-sale, and thus make our members benefit from this craze.

### 6.3 Pre-sale functioning

The pre-sale functioning is very simple. As for all our products, we designed the system so that it would be easily understandable. ICOs are usually complex, not to mention their registration process. People often don't know what to do or how to do it, and there is usually little to no information on which to rely on. People then give up the process and just go to the next ICO, which turns out to be as complex as the previous one. We solved this puzzle for you. Here are the pre-sale steps to follow:

#### Registration

To register to the ADD TOKEN pre-sale, click on the "Registration" tab, accessible via the [www.addtoken.io](http://www.addtoken.io) website menu and enter an email address in the appropriate field.

In the following 15 seconds, the registration management system will send a validation message to the member's email address.

The member must consult the received email and click on the "Confirm my email address" button for our system to confirm that the emails will be sent to the correct location.

The system will then ask to provide a password, preferably a complex one so that nobody can guess it. This password will allow access to the web wallet; it is then recommended to avoid common ones.

Once this step is finished, the registration process is completed and the member is on the waiting list.

### **The purchase time**

The system will assign a purchase time according to the member's position on the waiting list. In order to avoid overloading our servers, we will grant access to the pre-sale to 2 000 people per hour. These people are categorized according to the date and time at which they registered to the pre-sale in order to respect the priority.

The purchase time will be displayed according to Greenwich Mean Time (GMT+1), also known as "Hour 0" on the client access. The time and date are displayed at the top of the client access screen. A countdown will also be displayed. The ladder will outline the remaining time before the sale period.

### **The pre-sale**

One hour before the exact sale time, a reminder email will be sent. It will explain the simple procedure to buy ADD TOKEN. Members must be ready when the moment comes; they must have their payment method at hand and be connected at the right time to enjoy the best prices offered before ADD TOKENs are all sold at each level.

### **ADD TOKEN management**

Once ADD TOKEN is purchased, the transaction will be displayed on the client access. It will be possible to make other transactions after an initial purchase.

One might buy more ADD TOKEN until they are all sold.

Important tools will be at the reach of the members on the client access. Here are some of them:

- The number of available ADD TOKEN
- The number of buyers
- ADD TOKEN's current price
- ADD TOKEN's current value
- The wallet's value
- The detailed transactions list
- Referencing information
- The current sale level
- The pre-sale end date

With this information, the members will have an overall idea of the situation and of the pre-sale performance.

End of the pre-sale

When the pre-sale ends, it will not be possible to buy ADD TOKEN from your ADD Wallet anymore, even if all the ADD TOKEN are not sold.

The remaining ADD TOKEN will be added to the public sale wallet.

It will then be possible to transfer ADD TOKEN in private Ethereum wallets or to leave them in the ADD Wallet while waiting for the official, complete DApps ADD Wallet launch, as of estimated 1 months after ICO launch.

#### **6.4 The calculator**

On ADD TOKEN's website, you will find a section called "Calculator". This tool is designed to give you an idea of the potential of our cryptocurrency.

The tool will ask you which currency will be used for the ADD TOKEN purchase. Note that this currency is updated every 5 seconds according to the current global value, to give you the most precise numbers as possible.

Once you have chosen a currency, you may use the tool to display the amount that you wish to spend on ADD TOKEN. Please keep in mind that this tool relies on the possibility that you bought ADD TOKEN at the price of US\$ 0.30 per unit and on the possibility that the 75 million available ADD TOKEN are sold during the pre-sale.

The profit percentage decreases considerably at each sale level.

We explain this fact with this passage:

This calculation tool relies on the pricing scale of the first sale level, which will be activated on the pre-sale launch (US\$0.30 per unit). The evaluated value (US\$ 1.20 per unit) relies on the possibility that all of the ADD TOKEN is sold within the pre-sale period. If this is the case, your initial purchase will be multiplied by 400 % in 60 days or less.

You also have the "I want to invest more" option, at the bottom of the calculator. By clicking on this button, the numbers displayed on the calculator will be increase.

#### **6.5 Return on investment**

The return on investment (ROI) is the projected gain on your ADD TOKEN purchase, considering that you must sell your ADD TOKEN.

Here are the expected returns on investment, relying on the possibility that all ADD TOKEN are sold during the pre-sale (By The Mean Of Public Sales Price at US\$ 1.20 per ADD Token):

- Sale level 1: ROI after 60 days or less: 400%
- Sale level 2: ROI after 60 days or less: 300%
- Sale level 3: ROI after 60 days or less: 200%
- Sale level 4: ROI after 60 days or less: 100%

These numbers might seem enormous, but they are real. For comparison purposes, hereunder are shown some ROI examples from previous ICOs:

- Bitcoin: 1 887.36%
- Ethereum: 7 951.36%
- Ripple: 3 005.48%
- Litecoin: 938.46%
- Dash: 88 736.89%
- Monero: 1 539.95%

We are rather conservative in these comparisons. This information is displayed only to show to novice people that cryptocurrency's value is ever growing. This growth is principally generated by the craze around cryptocurrency and by the products that the companies offer in order to maintain the value of ADD TOKEN.

Please understand that the return on investment relies on the eventuality that all ADD TOKEN are sold during the pre-sale. If not, you may consult the value according to the number of available ADD TOKEN on our calculation tool.

## 6.6 Payment methods

During pre-sale, no multiple payment methods will be accepted:

- WE ACCEPT ONLY Ethereum (ETH) based on daily exchange rate.

Denied payment methods during the pre-sale:

- ADD Foundation strictly prohibit cash sales for this current ICO.

## 6.7 Sale levels

We established four gradual sale levels during the pre-sale:

From X Token	Up To X Token	Price	Incoming
1	18,750,000	0.30 USD	5,625,000.00 USD
18,750,001	37,500,000	0.40 USD	7,500,000.00 USD
37,500,001	56,250,000	0.50 USD	9,375,000.00 USD
56,250,001	75,000,000	0.60 USD	11,250,000.00 USD
		<b>Summary</b>	<b>US\$33,750,000.00</b>

## 6.8 ADD TOKEN PRICE

ADD TOKEN's purchase price and its value during pre-sale are two different concepts. Its value relies on an algorithm that will make it increase at each transaction.

The established base price is US\$ 0.30, but its initial value is US\$ 0.60. On the sale level 1, the price will remain of US\$ 0.30, but the value will always be increasing. At every ADD TOKEN transaction, the value will rise.

There is a tool on the client access that will inform you of the ADD TOKEN value during the pre-sale. You can also verify this information on our website, on the sale levels tab. We displayed a value/quantity graph; you will then be able to hover the cursor over the graph to consult the precise data according to the number of ADD TOKEN sold.

For example, after we sell 18 millions of them, the purchase price will remain US\$ 0.30 per unit, but its unitary value will be of US\$ 0.40. Your wallet's value will thus increase continuously.

The expected final value after the 75 million ADD TOKEN are sold is of US\$ 1.20 per unit. This value will remain the same until its market entry on exchange platforms in end of February 2018.

We estimate an approximate unitary value of US\$ 4.80 before the end of the mid Year 2018, and a value of US\$ 9.60 per ADD TOKEN by the end of 2018.

## 6.9 BONUS

In ADD TOKEN's business plan, you will find four types of ADD TOKEN bonuses:

### 1. Sign Up Bonus

These bonuses are issued when a member sign up and answers the questions asked on the client profile. A total of 10 ADD TOKEN per sign up will be delivered after we have reviewed the profile and goes through verification process. This is also known as Early Bird promotion where only first 5000 registrations are applicable.

We implemented these bonuses for one simple reason. We want you to live the ADD TOKEN client access experience with real transactions since the beginning of your journey with us. When the pre-sale launches, your bonus ADD TOKEN's value will increase, which will certainly make you want to have more in your account.

### 2. Reference Bonus

This bonus is issued with 10 ADD TOKEN. Each referred person who subscribes will be linked to your account as referrer/referred. A process of sending you your referral code will goes through email.

Therefore, only with that code that your friend are able to fill up the referral section.

The referred person, who became an ADD TOKEN member thanks to you, will receive 10 ADD TOKEN bonus upon successful Sign Up. This bonus is only limited to first 5000 registrations.

And at the same time, we also show our gratitude to those whose referral which have not only sign up but also has join our ICO after submitting their token swap. This bonus is issued by percentage. Each referred person who subscribes and actual involve with token swap to your account as referrer/referred. A total of 10% out of the total purchase amount shall be given to you after verification process. And these features will only be active during the Pre-Sale time.

#### **6.10 UNITS AVAILABILITY**

The total number of available ADD TOKEN is 5 00 000 000.00ADD.

The total number of ADD TOKEN on sale is 75 000 000.00ADD.

The total number of ADD TOKEN exclusively reserved for advertising, promotion and marketing bonuses is 15 000 000.00 ADD.

No additional ADD TOKEN will be created. When all ADD TOKEN are issued, there will be a total of 5 00 000 000.00 ADD TOKEN in circulation. We configured the ADD TOKEN so that it can display up to 8 decimals after the 0. This will be necessary if its value increases so much that it is possible to buy parts of them (buying 0.005 ADD TOKEN or 0.00000008 ADD TOKEN, as an example).

#### **6.11 HOW TO BUY THEM?**

The ADD TOKEN purchase procedure has been simplified to the maximum in order to respect our commitment to the public, which is to make cryptocurrency highly convenient.

On a regular ICO, a person who desires to buy tokens has to already possess cryptocurrency, such as ETHEREUM. On the new ICO's website, you will find a wallet address, to which you must transfer the desired amount in Bitcoin.

This transaction cannot be made from exchange platforms such as Poloniex, Bittrex or Coinbase, but from a private wallet that belongs to you.

Complicated, isn't it?

One hour before your purchase moment, you will receive an information email from ADD TOKEN in order to notify you to get ready to purchase. Once the moment has come, go to the ADD TOKEN website and connect to your profile. You will then see, in the "ADD Wallet" section, the "Buy" button, which will be in colour when you will be allowed to make a purchase.

Click on the "Buy" button. On the next page, you will find the terms and conditions, which you must read and confirm to agree on by checking two boxes. You will then be invited to make payment by "ETHEREUM BUY BUTTON".

ADD TOKEN innovates: instead of having only one wallet to receive the ETHEREUM used by its members who buy tokens, it is ADD TOKEN's system that will help you to complete the registration to a private wallet for each cryptocurrency that we accept as a payment method. This prevents security problems and prevents hackers from attacking one wallet address where all the money would be.

Buying ADD TOKEN with ETHEREUM is simple. Copy your ADD TOKEN personal wallet address and transfer the desired number of ETH from any exchange

platform. You may use Poloniex, Bittrex, Coinbas and other ones without any issue.

When your ETH is in your private ADD TOKEN wallet, our systems will automatically detect the transaction and immediately exchange the ETH value into ADD TOKEN.

When you make a ETH transaction, once the transfer is processed, the transaction will appear in the transactions list on your client access. It will be "Pending" until your ETH transaction is confirmed.

If you interact with a private Ethereum management app, you will have to indicate an amount in GAZ as well as an amount in GWUI.

Suggested GAZ amount: 200000

Suggested GWUI amount: 50

## 6.12 HOW TO SELL?

On the client access, at the right of the "Buy" button, you will find the "Sell" button. When the pre-sale ends, you will have the opportunity to sell your ADD TOKEN according to the current value. It will also be possible to transfer them to another private wallet, which will be a "myetherwallet" and to download your cryptocurrency on a USB drive.

To sell your ADD TOKEN from the client access, click on the "Sell" button. The system will display the following ADD FOUNDATION details:

- The number of ADD TOKEN owned;
- The number of bonus ADD TOKEN owned;
- The total number of ADD TOKEN available for sale;
- The current ADD TOKEN value.

You may then indicate the number of ADD TOKEN that you are selling in the appropriate field. The transaction will be immediate and definitive. It will also be listed in your transactions display.

The money earned from your ADD TOKEN sale will be added to your wallet in USD. From this wallet, you may ask for a withdrawal by direct transfer or you may buy more ADD TOKEN.

When you receive your ADD EXPRESS CARD, it will be easy to transfer your ADD TOKEN and/or your US dollars on it in order to spend your money privately.

## 6.13 HOW TO TRANSFER?

When the ADD Wallet is officially launched, you may download the mobile application on the device of your choice (iOS or Android). You also may install ADD Wallet on a tablet, a PC or a MAC.

The "Transfer" option may be used to transfer your ADD TOKEN from your ADD Wallet to an external wallet. You may then transfer funds to a friend who is on the other side of the world or to a family member in seconds and at no cost. You may also receive transfers from your contacts. It is your money; you should be able to do whatever you want with it!

6.14 THE DISTRIBUTION

THE TOTAL ADD TOKEN AMOUNT at 100% = 500,000,000 ADD

TOTAL OF TOKEN SALE DURING ICO at 52% = 260,000,000 ADD

**TOTAL REMAINING AFTER ICO DISTRIBUTION at 48% = 240 000 000ADD**

## 6.15 PRE-SALE EARNINGS

According to a simple calculation, here is the expected amount to be earned from the ADD TOKEN pre-sale:

Level 1 = 18,750,000ADD TOKEN X US\$ 0.30 = US\$ 5,625,000.00

Level 2 = 37,500,000ADD TOKEN X US\$ 0.40 = US\$ 7,500,000.00

Level 3 = 56,250,000ADD TOKEN X US\$ 0.50 = US\$ 9,375,000.00

Level 4 = 75,000,000ADD TOKEN X US\$ 0.60 = US\$ 11,250,000.00

A total of 75 million ADD TOKEN sold at **US\$ 33,750,000.00**

## 6.16 PROJECT BUDGET

The funds earned from the ADD TOKEN pre-sale will be used according to the chart. Regardless of the received amount, the funds will always be used in these proportions. Our budget structure allows for a large part to be used for the market maintenance. This will ensure a consistent increase of ADD TOKEN's value, even if members sell their assets massively.

### **20% - IT Technology Development Reserves**

A budget of 20% of the revenue will be allowed to ADD FOUNDATION' future IT Technology products development. This budget will be used to improve the user's experience and to maintain it up-to-date. The team at ADD FOUNDATION will design easy-to-use and safe products and applications, in accordance with the main mission of the company. The financial health of the ADD TOKEN market relies on its security. We will use every necessary and available means to secure your transactions and to protect our infrastructures against potential attacks.

### **24% - Future Development Reserves**

Our Business Development Team is always in search for a better future development. Currently there are already a few great prospects that the foundation shall look into it in order to strive an even more successful goal.

### **6% - Advertisement, Promotion & Marketing**

ADD TOKEN must be known by everyone. Same as our ADD WILL product, We want to expand more in the underdeveloped countries that wish to use their own money in a safe way and also for the safe keeping of their financial assets. We also wish to be present in the world's biggest cities. As for these matter as well, the Marketing Team are working very hard in order to achieve this goal. We shall support them with this allocation.

### **40% - Core Team / Operations / Market maintenance**

To ensure quick and efficient transactions, our networks management team will always be optimizing our networks and redundancy architectures everywhere in the world for your transactions to be fast and for our products to remain secure. We also reward our team members greatly with token of appreciation as human resources are one of the most important key role of success. These include our Legal Department expenses where Laws differ from one country to another. ADD FOUNDATION needs to ensure compliance with these laws. Even if our services are decentralized, we need to protect the members that use our services in countries where laws about cryptocurrency are not clearly dictated.

The major part of the pre-sale earned funds will be reserved for this use. Our market maintenance team will remain on the lookout for ADD TOKEN's value fluctuations when it will be launched on the market. The team will limit the value

decreases by buying if the value drops. This part of the budget will also be used to buy member's ADD TOKEN on demand via ADD FOUNDATION. We will thus guarantee a rather steady increase of ADD TOKEN's value and will avoid high price fluctuations in case of mass purchase or sale from our members.

#### **6% - Community Foundation**

The Foundation believes in a great value of community work. This is consider as the best way of getting more to involve actively in order to secure the best well-manage Foundation committee.

#### **4% - Social Welfare**

Here at ADD Foundation, we always believe of the righteousness of helping or giving aid to the community. Setting a special reserves fund to provide a better tomorrow for the needy also means the achievements of giving hand out to reach the world. Many community service and donations planning has been allocated with this fund. That includes of education scholarship under ADD Foundation so we may help the younger generation to achieve the high success of tomorrow.

## 7. Finance

Our company is taking off and we promote a new business model that offers significant innovations. This compromises the assessment of the popularity of our products and complexes the predictions of the impact of these on the population. Therefore, we created not one, but two tables of financial forecasts for the next five years. One displays conservative numbers, and the other displays optimistic numbers.

### 7.1 Abstract

ADD Foundation and its products' revenues will only come from ADD WILL, which will be launched at the end of 2018. We want to reduce to a minimum the fees paid by our members so we can increase the number of people who use and appreciate our products and our cryptocurrency to the maximum.

ADD TOKEN will profit from the ADD TOKEN sale and from the purchase of these. The company will then offer this profit to its members after the pre-sale. If clients wish to buy ADD TOKEN (if any still available) after the pre-sale, they will pay an estimated price 40% higher than the current ADD TOKEN value in the public sales at our trading platform partners. For those who wishes to sell may also sell them at the trading platform in order to exchange for cash. And the ADD Express Card shall play a major role for those who wishes to gain ease financial access of international withdrawal.

Since January 2017, Ethereum and the cryptocurrency market increased their value of almost 300 000% yearly (6.7 times per three months). We do not believe that this increase will last for a long time, but the market will stabilize over a few years.

It is time to take advantage of the buzz around cryptocurrency and to use its services. Do not forget that, at the very beginning, the Bitcoin sold at less than US\$ 0.03 per unit and that now, it sells at more than US\$ 3 000: a phenomenal increase of 10 000 000%.

Hereunder you will find our conservative financial forecast, as well as the optimistic one, for the five years to come.

Hereunder you will find our conservative financial forecast, as well as the optimistic one, for the five years to come.

## 8. FUTURE DEVELOPMENT

### **“ADD WILL” The Secure Encrypted Digital Will “Your Will is Our Command”**

"Encrypted Digital Wills" will be the latest service platform for the development and integration of large data technology, which will be used to solve the unfair agreement rooting to challenges of family disputes, capital monopoly and relationship rupture. It is also to set back the traditional contract transactions and to grasp the assets and services system.

The team is committed in creating a combination of block chain + smart contracts + financial services in a mission of creating the world's first "encrypted digital will" in order to innovate people's understanding of asset digitization.

Node with the encrypted block chain assets, decentralizing management and intelligent smart contract, both party will easily reaches a transaction agreement with characteristics of the enhance future digital tokens towards an unlimited value of usability.

Block Chain Application Management Collectively integrates excellent intelligence for our technical team in order to actively expand the importance of our infrastructure and service systems. These ensure the collaboration of handling and solving the future complex issues.

The will is that everyone knows it's important!  
But how many people will really plan beforehand!  
To ensure that property, assets can be renewed to the next generation?

For decades, traditional text documents submitted to the law firm, who will be complicated procedures to digitize it? The rapid development of the national economy, the old property left over from the ancestors and lots of nobody claimed to hinder economic development, the government every 20 years to rectify the need to clean up the remnants of relics and trillions of dollars. Prior planning to give yourself a person in charge of life, will be a practical stability, security, considerate account to the family and loved ones!

ADD WILL "Encrypted Digital Candidate" is a new generation of technology that provides digital will services through intelligent contract distributed block chains to solve most of the intricate families, friends, colleagues, shareholders, partners and ignorant relationships Problem!

We strive to improvise our technology with future Virtual Reality (VR) enable concept where Artificial Intelligent (AI) will also be playing some major key role.

## 8.1 CONCLUSION

### Development Roadmap Timeline

Dec, 2016	Secure Encrypted Will Writing Idea Founded
Jan, 2017	Research And Analysis
March, 2017	Research & Development on Ethereum Base Smart Contract Block Chain Digitalization on Will Testament Writing
May, 2017	Beta test of deployment of Smart Contract
June, 2017	Preparation for ICO Smart Contract
August, 2017	White Paper Documents Preparation
September, 2017	ADD TOKEN Official Website Platform Launch
October, 2017	ICO Smart Contract Deploy And Mark The Official Launching of ADD TOKEN PRE-SALE START
December, 2017	PRE-SALE END
January, 2018	Beginning of Official ADD TOKEN Officially Launch
February, 2018	ADD Wallet Launch
March, 2018	Officially Trading Platform Public Sale

**The dates of this table are subject to change. They are approximative and may depend on many factors that might cause delays or an early launch.**

## **9.0 Legal Notice & Terms of Use**

### **Terms & Conditions**

This document is not a prospectus. It was created with the sole purpose of information, to explain ADD Foundation' products. No purchase is necessary; the decision to take part in the project or not is on you. It is your responsibility to consult the applicable laws of your country before purchasing ADD TOKEN. ADD Foundation disclaims any responsibility mentioned in this document and commits to comply with the laws outlined hereunder.

### **9.1 Applicable laws**

This Agreement shall be governed and construed in accordance with the laws of Singapore.

All disputes, controversies or differences arising out of or in connection with this contract, including any question regarding its existence, validity or termination, shall be first referred to mediation in Singapore in accordance with the Mediation Rules of the Singapore International Mediation Centre for the time being in force.

### **9.2 Acknowledgements**

We thank all our collaborators, our employees, our vendors, our law firm, our accounting firm, our notary firm, our cryptocurrency specialists, our security firm, the government of Singapore and every other organization and supplier for the support provided to our company.

We especially thank every member and ally. Without you, ADD Foundation would not exist.

### **9.3 Legal Notice & Disclaimer:**

The ICO White Paper has been approved for high-level approval and is willing to assume collective or personal responsibility for the accuracy of the information provided and confirms that there is no false or misleading statement or fact after making all reasonable inquiries. Please read this whole section carefully. If you have any questions, please ask your legal, financial, accounting, or other professional advisor.

### **Important Legal Terms:**

- 9.3.1 Program Executives have authorized the official website to publish this white paper, which is currently available to some subscribers under the current acknowledgment and confidentiality of the ICO White Paper to assist them in deciding whether to purchase the ADD tokens.
- 9.3.2 ADD does not belong to any jurisdiction issued by the jurisdiction, the ICO white paper is not as a prospectus or to provide any form of document, does not intend to constitute any offer of securities or investment in any

jurisdiction of the securities. Unless otherwise specified, the information contained in this ICO White Paper is the latest information at the time.

- 9.3.3 This ICO white paper does not and should not constitute a proposal by the program executor, or any other party to buy the ADD token. This ICO white paper can not and should not be considered as a comprehensive independent assessment and analysis. Each recipient shall conduct his own independent investigation and analysis of all relevant matters, and each recipient shall consult his own professional adviser.
- 9.3.4 This ICO White Paper is restricted or prohibited by law in certain jurisdictions or in certain jurisdictions. The program executive requires each recipient to seek appropriate professional advice on and compliance with any such restrictions or prohibitions. The Program Practitioner shall not be liable to any person for the distribution or possession of this White Paper in any such jurisdiction.
- 9.3.5 No person shall agree with any contract or binding legal undertaking relating to the sale and purchase of the ADD tokens and shall not accept any digital currency or other form of payment on the basis of this white paper.
- 9.3.6 Any agreement relating to the sale and purchase of the ADD token is governed only by a separate document which specifies the terms and conditions of such agreement (the ADD clause). If the ADD clause is inconsistent with this white paper, the terms of the ADD shall prevail.
- 9.3.7 The regulatory body does not review or approve any information provided in this ICO white paper and this white paper will not seek any legal, regulatory requirements or approval of the rules of any jurisdiction; the publication, distribution or dissemination of this ICO White Paper does not imply the application Legal, regulatory requirements or rules are observed.
- 9.3.8 The ICO White Paper does not comply with any jurisdiction of the jurisdiction of the jurisdiction, nor any jurisdiction of the relevant body (or any law relating to any regulatory body or other body), and does not constitute an offer or invitation to the question of ADD tokens.
- 9.3.9 Program Executives, ADD tokens and their respective structural, operational and operational risks and uncertainties.

This ICO White Paper and any part thereof and any copies thereof shall not be used or transferred to a State which prohibits or restricts the distribution or dissemination of this ICO White Paper.

- 9.3.10 This ICO White Paper may not be reproduced in whole or in part for any other purpose, or displayed, given, reproduced or submitted to any other person, including but not limited to any government or regulatory

authority, unless prior to the Program Executive or applicable to the Program The practitioner's legal needs.

9.3.11 Any person shall not grant any information or data or make any representations or warranties other than those contained in this ICO White Paper. If any such information, data, statement or warranty is provided or provided, it shall not rely on the Authorized Program Practitioner, or any other person.

9.3.12 By accepting the delivery of this ICO white paper (deemed to be accessed by downloading the website by <https://addtoken.io> or by visiting this white paper in any way), each recipient agrees that the ICO White Paper is provided to the White Paper And further agree and confirm that:

It will keep all of this information and data;

In the case of

It is lawful for the recipient to receive this ICO white paper and / or to purchase the ADD tokens in all jurisdictions in which the addressee is located;

The recipient has complied with all applicable laws that have received this ICO white paper and / or purchased the ADD token;

Program Executives, and their respective directors, officers, employees and professional advisors will not and will not violate due to the delivery of ICO white papers and / or purchase of ADD tokens if the ICO White Paper is delivered and / or purchased with ADD tokens Yes or Illegal , Is not enforceable, invalid, does not assume any responsibility and obligation;

ADD toll may be provided, sold, transferred or otherwise disposed of directly or indirectly in accordance with the relevant sales restrictions and all applicable laws;

Have sufficient financial and operational knowledge and experience to be able to assess and purchase the benefits and risks of the ADD token and be able to and be prepared to bear the economic and financial risks of purchasing and / or holding ADD,

Make sure to buy ADD tokens for your own account

Agree and confirm that the ADD token is not interpreted, classified or processed as follows:

Any type of currency;

Any bond or stock issued by an individual or entity;

The rights, options or derivatives of such debentures, shares or shares

The power to ensure profits or to avoid losses;

Any type of investment plan unit;

Any type of trust unit;

Any form of derivative;

It is not clear that the information contained in this ICO White Paper may be incomplete;

In the case of

For all matters relating to the purchase, sale and holding of the ADD tokens not specifically specified in this ICO White Paper, you can fully understand all matters that may reasonably be reasonably known as reasonably knowledgeable and are familiar with digital currency, , The work and complexity of the currency coin, and / or other types of digital tokens, and irrevocably and unconditionally confirm their knowledge of the operation, function, use, storage, transmission mechanisms and other material properties of digital money , Block-based software systems, digital wallet or other related token storage mechanisms, block-chain technology and intelligent contract technology.

9.3.13 The delivery of this ICO White Paper and the sale or delivery of any ADD tokens shall not in any way imply that the information relating to the Program Enforcer contained herein is correct at any time after the date of this Agreement or is provided in a continuous manner Any other information is correct at any time after the ADD token is on the date that contains the same file.

9.3.14 This ICO white paper includes information on the sources mentioned in this ICO side, estimates or related reports, significant operations operated by the Program Executives and certain other matters. Makes no representations or warranties with respect to the accuracy and completeness of any information, estimates and / or reports arising from such type and other third party sources.

9.3.15 This ICO white paper contains "forward-looking statements". These statements include, inter alia, a discussion of the business strategy of the program implementation and the expectations of economic conditions, future operations, profitability, liquidity, capital and financial status. All of these statements are based on the estimates and assumptions made by the program executor, although they are considered reasonable, but there are still risks and uncertainties that may cause actual events, and the future results of the program performers are the same as expected or expressed Declarations and estimates, and can not guarantee that any such statements or estimates will be realized. In view of these and other uncertainties, the inclusion of forward-looking statements in this ICO White Paper should not be considered as a plan or implementation of any plan or objectives that the Program Executive or any other person represents or undertakes to plan.

- 9.3.16 Executives or any other personnel will achieve the plan and objectives of the Program Executives.
- 9.3.17 Chinese residents, residents of Singapore / citizens or residents of the United States / citizens or green card holders may not be eligible and may be prohibited from purchasing ADD tokens. Whether you are in contact with Singapore or the United States, please check with your professional advisor to check if you are eligible to purchase the ADD token.
